

Triangle Sum Theorem

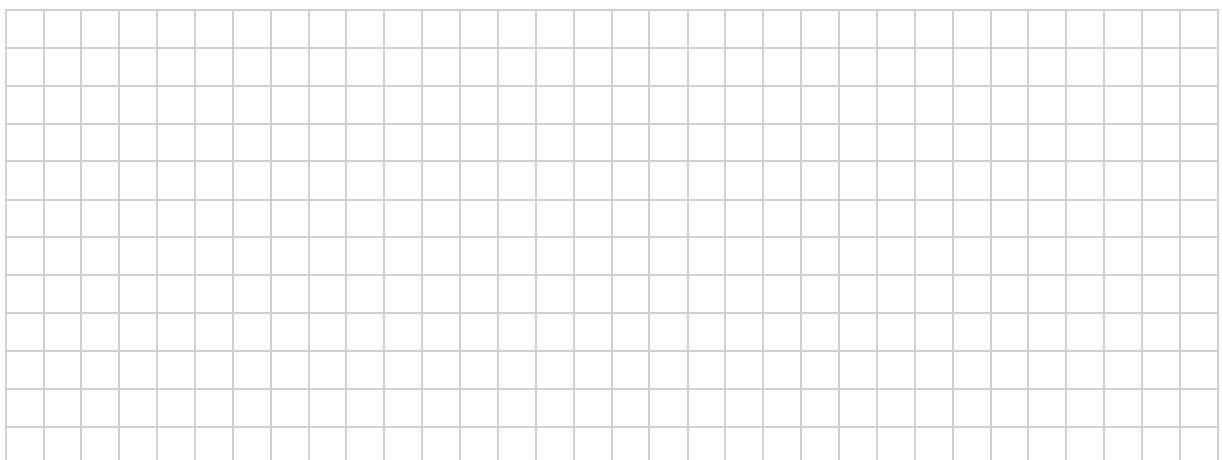

- ▶ Drag any of the vertices of the triangle. Observe the measures of the three angles and the sum of the measures. What do you find out?

A large rectangular grid consisting of 20 columns and 15 rows of small squares, intended for students to take notes or draw diagrams.

- ▶ State your finding as a conjecture.

A large rectangular grid consisting of 20 columns and 15 rows of small squares, intended for students to take notes or draw diagrams.

- ▶ Explain why your conjecture is true for every triangle.

A large rectangular grid consisting of 20 columns and 15 rows of small squares, intended for students to take notes or draw diagrams.
